

# CPD Optometry Dinner Event

## Wednesday 4 July 2018 at Castlecrag

Featuring:

- Optical Coherence Tomography Masterclass
- Optomap Ultra-Widefield Fundus Imaging

We are pleased to invite you to attend our **retina-themed** educational event.

Our retinal sub-specialists will take you through interesting and challenging cases, with an emphasis on the diagnostic utility of **OCT scanning** and **ultra-widefield retinal imaging**. They will cover both medical and surgical retina cases.

You will have the opportunity at the event to have an Optomap image taken of your own eyes, as we will have an **Optos ultra-widefield retinal imaging** device on site.

The event will be held at **Holy Duck!** in Castlecrag. Holy Duck! is the latest creation by Chefs Gallery, the king of modern chinese cuisine. With a nod to the joys of street food, they transform traditional Chinese dishes into modern favourites. Come and enjoy a true showcase of next-level Chinese BBQ and roasts, with duck at the core of the menu.
